

EXTREME WATERSPORT PRESENTS

SANTO VANUATU

The 'President Coolidge' hit a mine in 1942 and rests on her port side on a steep incline, 100m from shore. She is a great wreck for divers of all levels and is easily accessible with her bow at 20m and stern at 80m. Your dive guides will ensure you see all of the best areas of the Coolidge. You will also dive Million Dollar Point where the US army disposed of its military equipment at the end of WW2. See tanks, bulldozers, cranes and trucks all on the ocean floor encrusted in corals.
